

MULLEIN

# LUMINESCINE

## A REVOLUTIONARY CONCEPT IN SKIN RADIANCE

COSMOS APPROVED

COSMOS CERTIFIED

### PRODUCT DESCRIPTION

LUMINESCINE is the first natural active ingredient for cosmetics based on plant photoluminescence, the emission of visible light by a substance caused by high (UV) energy light.

Flowers are the main tool for plant reproduction and they hide secret tricks to better compete for pollinating insects. Mullein (*Verbascum Thapsus*) flowers are able to harvest UV radiation and transform it into new visible light to appear brighter, becoming more visible in the meadow and therefore, having a greater chance to attract insects.

In creating LUMINESCINE we harvested this secret feature of flowers allowing to create highly innovative cosmetic products.

LUMINESCINE is able to protect from harmful high-energy UV radiation, transforming it into a source of light that radiates directly from the skin and hair making them looking more radiant, shinier, younger and healthier.

### BENEFITS

- Produces light due to **photoluminescence** (*in vitro* tests)
- Increases skin radiance (+5.5 Δ L a.u. *in vivo* test)
- Improve hair brightness and shine (up to +10.3 Δ L a.u. *ex vivo* test)
- Protects from UV-blue light induced **photo-oxidative stress** (*in vitro* tests)
- Inhibits tyrosinase and melanin synthesis (*in vitro* tests)

### TECHNICAL INFORMATION

**INCI:** glycerin, hydrolyzed *Verbascum thapsus* flower, citric acid, sodium benzoate, potassium sorbate.

**PLANT USED:** Mediterranean mullein (*Verbascum Thapsus*) flowers.

**TECHNOLOGY:** Bioliquefaction Technology.

**SUGGESTED CONCENTRATION OF USE:** 3-5% w/w.

**ORGANIC STATUS:** COSMOS approved, COSMOS certified.

**CHINA STATUS:** also available in China compliant version.

Forearm treated on the right with a gel containing Luminescine 4% w/w, effect in full sunlight

Excitation-emission spectra of Luminescine
